OKORO CHRISTOPHER OBINNA

Full-Stack Web Developer & Technical Writer | Web3 & Blockchain Developer

christofaokoro@gmail.com | linkedin.com/in/christopher-okoro | +234 705 447 6978 | Lagos, Nigeria

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Technical Writer with 3+ years of experience building modern web applications, GraphQL-based systems, and CMS-driven platforms. Currently specialising in Web3 and blockchain development on the Nervos Network (CKB) and Fiber Network, including building typed TypeScript SDKs and decentralised applications on testnet. Skilled at creating scalable, developer-friendly solutions and clear technical documentation that accelerates adoption. Strong commitment to open-source contribution and clean, well-tested code.

CORE SKILLS

Languages & Runtimes	JavaScript (ES6+), TypeScript, Solidity, HTML5, CSS3
Frontend	React.js, Next.js, Vue.js, TailwindCSS, SCSS
Backend	Node.js, Bun, Express, REST APIs, GraphQL, Apollo Client
Blockchain / Web3	CKB (Nervos Network), Fiber Network, Web3.js, CKB-CCC, JSON-RPC, Solidity smart contracts, testnet deployment
Databases	MongoDB
CMS & Tooling	Webiny CMS, Git & GitHub, CI/CD basics
Technical Writing	API documentation, developer tutorials, onboarding guides, Markdown, README authoring

WORK EXPERIENCE

Blockchain Developer (Contract) — CKB Builder Program

Apr 2026 – Oct 2026

Nervos Network | Remote

- Selected for the **Nervos CKB Builder Program** — a contracted engagement with the Nervos team to learn CKB infrastructure in depth and ship production-grade tooling on the network.
- Built **FiberKit** — a typed TypeScript SDK wrapping Fiber Network's JSON-RPC API, including channel lifecycle management, payment routing, event streaming, and a fully in-memory MockClient for local development; submitted to the "Gone in 60ms" Fiber Network Infrastructure Hackathon (July 2025).
- Developed **ContestLedger**, a decentralised contest platform deployed on CKB testnet; implemented on-chain vote signature verification, shannon-based reward distribution, and CKB transaction verification prior to any database writes.
- Engaged directly with Nervos Network open-source reviewers, responding to security feedback and publishing technical devlogs documenting the build process.

Design & Technology Lead

2024 – Present

Synnex Entertainment | Lagos, Nigeria (Hybrid)

- Lead all technical operations for an entertainment company, including website maintenance, email hosting infrastructure, and graphic design production.
- Monitor and analyse artist streaming performance across major platforms, providing data-driven insights to support creative and business decisions.
- Manage payment systems for both clients and internal operations, ensuring accurate, timely processing and financial record integrity.
- Serve as the sole technical authority across digital and creative functions, bridging engineering and operational needs in a fast-moving entertainment environment.

Technical Writer (Contract) Dec 2022 – Apr 2023
Webiny | Remote

- Authored end-to-end tutorials for a real estate search platform and a voice-controlled news blog built with React, GraphQL, and Webiny CMS — published on the Webiny blog and cited in community documentation.
- Produced step-by-step onboarding documentation for Webiny CMS workflows, measurably improving developer adoption based on engineering team feedback.
- Collaborated directly with engineering to verify technical accuracy across all content.

Technical Writer (Contract) Jul 2022 – Feb 2023
OpenReplay Blog | Remote

- Published 4 technical tutorials covering Vue, Node.js, Socket.io, and vanilla JavaScript speech recognition — reaching thousands of developers monthly.
- Built fully functional demo applications to accompany each article, reducing reader setup friction and improving tutorial completion rates.
- Translated complex engineering concepts into accessible, structured writing for a global developer audience.

Front-End Developer Intern Oct 2022 – Dec 2022
Hotels.NG (HNG Internship 9.0) | Remote

- Built UI components using React, SCSS, and Node.js for a kids' story illustrator web application within a cross-functional team of 12 developers and designers.
- Contributed accessibility improvements and provided technical support across the team.

Full-Stack Web Developer Intern Oct 2021 – Jul 2022
SmartHub Global | Port-Harcourt, Rivers State

- Collaborated on user-friendly web applications using React and Node.js, reviewing UI designs and implementing responsive interfaces.
- Gained hands-on experience with modern JavaScript libraries and professional development workflows.

PROJECTS

FiberKit — TypeScript SDK for Fiber Network
TypeScript, Bun, JSON-RPC, Fiber Network, CKB
GitHub: https://github.com/christofa

- Designed and implemented a fully typed TypeScript SDK wrapping the Fiber Network JSON-RPC API, with channel lifecycle management, payment routing, and event streaming.
- Built an in-memory MockClient for local development — zero node dependency, deterministic behaviour, smoke tests passing on Day 3 of a 15-day hackathon.
- Authored comprehensive README and JSDoc documentation to enable immediate developer adoption.

ContestLedger — Decentralised Contest Platform
Next.js, TypeScript, CKB Testnet, @ckb-ccc/core, Tailwind
GitHub: https://github.com/christofa

- Built a full-stack decentralised contest platform with on-chain vote signature verification using CKB's challenge-sign-verify flow.
- Implemented CKB transaction verification before database writes, shannon-based reward amounts, and on-chain outpoint references for immutable audit trails.
- Addressed security-hardening feedback from Nervos Network reviewers, including server-side signer constraints in Next.js API routes.

Real Estate Search Platform
React, Node.js, GraphQL, Apollo Client, Webiny CMS
GitHub: https://github.com/christofa/real-estate-platform

- Built a full-stack property search platform with GraphQL APIs, Apollo Client data fetching, and dynamic CMS-managed content.
- Designed for scalability and maintainability; published as a full tutorial on the Webiny blog.

High Grace College Website
Next.js, TailwindCSS, Express, MongoDB
GitHub: https://github.com/christofa/hgc-webpage

- Built a responsive full-stack institutional website with results checker, payments integration, and news board.
- Focused on cross-browser compatibility and clean, accessible layouts using HeroUI.

CupidNote — Anonymous Messaging Web App
React, Node.js, TailwindCSS, MongoDB
GitHub: https://github.com/christofa/CupidNotes

- Developed an anonymous messaging platform with message delivery logic and clean, responsive UI; designed as a themed Valentine's Day product.

PUBLICATIONS & TECHNICAL ARTICLES

Built a Real Estate Platform with React and Webiny CMS — Webiny Blog	Nov 2022
Built a Voice-Controlled News App with Alan AI & Webiny — Webiny Blog	Dec 2022
Rendering Real-Time Data with Vue, Node & Socket.io — OpenReplay	Jul 2022
Recognizing Speech in Vanilla JavaScript — OpenReplay	Aug 2022

EDUCATION

Bachelor of Science (BSc) in Computer Science Nov 2018 – Apr 2024
University of Port Harcourt | Port-Harcourt, Rivers State

INTERESTS

Web3 & Blockchain Development | Technical Writing & Developer Education | Open-Source Contribution | JavaScript Tooling
